Marc Ricart López

1. **For <p id="mission">**

    o   List all rules that apply to its color.

       #mission, .text and p.

    o   What is the final color, and why?

       Darkorange, because the #id has more priority than the .class.

2. **For <p id="team">**

    o   List all rules that apply to its color.

       .text, his own style label and p.

    o   What is the final color, and why?

       Darkblue, because his own inline style label has more priority than the class.

3. **For <p id="experience">**

    o   List all rules that apply to its color.

       #experience, .text, #about p:last-child and p.

    o   What is the final color, and why?

       Green because it has more specifity level since it has an #Id and a :pseudo-class.

4. **For <p id="services-intro">**

    o   List all rules that apply to its color.

       .intro, .text and p.

    o   What is the final color, and why?

       Blue, because .intro it's his first class.

5. **For <p id="offer">**

    o   List all rules that apply to its color.

       #offer, .text, p and his own inline style label.

    o   What is the final color, and why?

       Darkgreen, because it has the !important flag that overrides every other rule.
